DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Lowe et al. 4,067,939, Saito et al. 4,341,560 or Nitto Chem. Ind. Co, Ltd. JP-59-025876.

3. Lowe et al. disclose calcined gypsum and Portland cement in claim 1, Gum Arabic in claim 17 and acrylic resin emulsion (acrylic latex) in claim 27. For beta-calcined gypsum see column 4, lines 34-53 and column 5, lines 19-39. Saito et al. teach gypsum, calcium oxide and (meth)acrylic acid emulsion in claims 1-5, concentrations in column 2, lines 33-39 and beta hemihydrate gypsum in column 1, lines 64-68. Nitto Chem. recites all ingredients in the Abstract. Applicants' claims are not novel.

4. Claims 1-14 and 16-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Stewart et al. 5,424,099 or Inoue JP-60-171260.

5. Stewart et al. divulge calcium sulfate beta hemihydrate and concentrations in Table I, cement, superplasticizer, gypsum, superplasticizer and water in claim 1, polycarboxylic acids in claim 4 and sub-floor in claim 7. Inohue reveals all ingredients and floors in the Abstract. Applicants' claims are not novel.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

8. Claims 1-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stewart et al. 5,424,099 or Inohue JP-60-171260, in view of Lowe et al. 4,067,939, Saito et al. 4,341,560 or Nitto Chem. Ind. Co, Ltd. JP-59-025876.

9. All references have been discussed already. It would have been obvious to one having ordinary skill in the art; at the time the invention was made, to add the lime of Saito et al. or Nitto Chem. to the composition of the primary references in order to improve the mechanical strength and to replace or partially replace the superplasticizer with Gum Arabic since it is a cheap functional equivalent.
